LEO MABUKU

SOFTWARE DEVELOPER | COMPUTER SCIENCE STUDENT | ENTREPRENEUR

Kitwe, Zambia | +260 770 464 736 | leokmabuku@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Fourth-year BSc Computer Science student and software developer building Android, web, systems and programming-language projects. Combines C/C++, Python and Kotlin development with entrepreneurship, live network operations, testing and user-focused problem solving. Open to graduate, internship and junior software engineering opportunities.

TECHNICAL SKILLS

Languages: C, C++, Python, Kotlin, Java, JavaScript, SQL, HTML and CSS
Mobile & web: Android Studio, Jetpack Compose, Room/SQLite, Firebase, Node.js, Express and Astro
Systems & delivery: Git/GitHub, Pytest, PLY, Tkinter, PostgreSQL, Cloudflare Pages and technical documentation
Additional: Networking fundamentals, hardware diagnostics and repair, component replacement and soldering

EXPERIENCE

Founder & Network Service Operator | **Starlink Internet Service** — Kitwe | Feb 2026–Present
- Operate a Starlink Mini and ARRIS mesh service for 29 subscribers, covering a boarding house and approximately 30 metres beyond the property.
- Manage onboarding, payments, subscription periods and connectivity support; designed SubTrack BH to centralise operational records.

Founder, Sales & Operations | **Leo M. Suppliers** — Livingstone | Feb 2022–Apr 2026
- Developed a field-based bedding venture into a PACRA-registered business with a physical shop opened in September 2022.
- Managed procurement, stock, sales, marketing, customer service and deliveries; adapted the product range to furniture and learned assembly.

Independent Software Development & Technical Tutoring | **Self-employed** — 2024–Present
- Provide paid programming tutoring, debugging, project setup and feature customisation, with an emphasis on explaining code and project structure.

Data Analytics Trainee | **MedTourEasy** — Remote | Sep 2025
- Completed a four-week training programme and live analytics project, applying structured analysis while observing professional confidentiality.

HACKATHONS & AWARDS

GreenCode Hackathon — Top Six Team | **Garage48 & BongoHive** — Lusaka | 30 Oct–1 Nov 2026
- Selected among the six winning teams out of roughly 100 Zambian builders, earning follow-on support from Garage48 and BongoHive and a share of the €6,000 award fund.
- Co-built SmartWater Zambia, an IoT water-monitoring and community reporting platform, and presented the working prototype to the judging panel.

SELECTED PROJECTS

TongaLang | **Python, PLY, Tkinter, Pytest** — Educational interpreted language with a custom lexer, parser, AST, interpreter, IDE tools, bilingual errors, 17 examples and 147 passing automated tests.
SmartWater Zambia | **Kotlin, Compose, React, Node.js, Supabase** — IoT water-monitoring and community reporting platform built in 48 hours at GreenCode: ESP32 telemetry, calibrated tank levels, SSE live dashboard, incident map and native Android customer app.
SubTrack BH | **Kotlin, Compose, Room, Firebase** — Local-first subscriber and payment workspace designed around the active 29-subscriber internet service.
CBU-FIND | **Kotlin, React, Firebase, Cloudflare** — Completed cross-platform campus lost-and-found with verified claims, private handover messaging, signed media and moderation.
SERC Mini-OS | **C, Raylib, Win32** — Operating-systems simulator covering four CPU schedulers, memory allocation, paging, IPC, deadlock safety and regression tests.

EDUCATION & PROFESSIONAL DEVELOPMENT

BSc Computer Science | **The Copperbelt University** — 2023–Present | Expected Sep 2026
Training: Prompt Engineering for Everyone — IBM Skills Network / Cognitive Class, Oct 2025; Data Analytics Traineeship — MedTourEasy, Sep 2025
Business courses: Marketing & Sales, Money Skills and Entrepreneurial Skills — Absa Skills
